DECLARATION FOR REISSUE PATENT APPLICATION

As the below-named inventor, I hereby declare that:

My name is Magnus Bolmsjö.

My residence, post office address and citizenship are as stated below next to my name.

I believe I am the original, first and sole inventor of the subject matter which is described and claimed in Patent No. 6,366,818, granted April 2, 2002, for Method and Device for Combined Heat Treatment of Body Tissue, and now as claimed in the attached specification for reissue of said patent and as further amended by the accompanying Preliminary Amendment.

I have reviewed and understand the contents of the above-identified reissue specification, including the claims and the Preliminary Amendment.

I acknowledge the duty to disclose information which is material to patentability as defined in CFR 37 § 1.56.

A priority claim is made under 35 U.S.C. §§ 119 and 120, to Swedish application 9900382, filed February 4, 1999, to international application PCT/SE98/01417 filed July 28, 1998, and to U.S. application Serial No. 08/981,878, filed January 6, 1998.

DECLARATION FOR REISSUE PATENT APPLICATION

I believe the original patent to be wholly or partly inoperative or invalid, by reason of errors in claiming less than should have been rightfully claimed in the original patent. The errors include the failure to claim priority to my co-pending US applications identified above; the failure to explicitly cite, and possibly consider, that prior art mentioned in the specification at column 1, line 27 and at column 2, lines 2-3; the dependency of method claims 10-12 from the device claim 9, rather than method claim 14; certain discrepancies in claim language relative to descriptions in the specification; and the failure to claim less that I had a right to claim as represented by the new claims presented in the reissue specification.

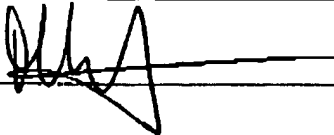

All errors corrected in this reissue application arose without any deceptive intention.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon, or any patent to which this declaration is directed.
